## **FOR IMMEDIATE RELEASE**

Date: June 7, 2006

TSX-V Symbol: SAE

### **DRILLING COMMENCES**

Vancouver, BC –Sable Resources Ltd. is pleased to announce that drilling has commenced at the Creek Zone on the Company’s Shasta Property. This program is designed to test the gold and silver mineralization that was delineated during the successful 2004 and 2005 exploration seasons.

Drilling in 2005 demonstrated two distinct types of mineralization: the Hanging Wall and the Stockwork structure. The Stockwork zone was found below the Shasta fault at a depth that had not been previously tested.

Highlights of the 2005 drilling include 0.197 ounces of gold per ton and 15.98 ounces silver per ton over 18.29 metres and 0.125 ounces of gold per ton and 3.61 ounces silver per ton over 27.43 metres. See news releases dated February 2<sup>nd</sup> and 15<sup>th</sup> of this year for more detailed results. The Stockwork Zone has demonstrated continuity and remains open to expansion at depth, and along strike in both directions.

The Company’s initial phase will consist of approximately 2,000 metres of diamond drilling. Drilling will target an expansion of the Stockwork structure outlined last year and will focus on defining grade and quantity. Mining plans will be further developed from this information.

### **ABOUT SABLE**

Sable Resources is focused on the development and exploration of its Shasta and Chappelle Properties in the Toodoggone region of northern British Columbia. Sable owns a modern, fully-permitted 200-ton per day mill and supporting infrastructure.

For further information, contact Mr. Mel Rahal, President at (604) 685-8565, or via email at [info@sableresources.com](mailto:info@sableresources.com).
